## **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee. The amendment shown below is to correct a minor informality related to the antecedent basis to the term "non-photosensitive outermost layer" and the change of the term "the polymer latex" in claim 3 since no term "polymer latex" has been previously claimed in the layer adjacent to the non-photosensitive outermost layer. There are no change in scope of the claimed invention.

The application has been amended as follows:

Claim 1, line 12, between "the" and "outermost", insert --non-photosensitive—therein; line 13, between "the" and "polymer", insert, - hydrophobic — therein;

Claim 3, on page 3 of 11, line 6, between "the" and "outermost", insert -- non-photosensitive -- herein; line 7, between "the" and "outermost", insert -- non-photosensitive --; line 8, after "respect to", delete "the", and replace with -- a -- therein;

Claim 9, on page 4 of 11, line 1, after "3", insert --, -- therein;

Claim 13, on page 4 of 11, line 8, between "the" and "outermost", insert -- non-photosensitive --.

## **REASON FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance: it was agreed with the applicants that none of the applied prior art of record teach or fairly suggest the use of the gelation accelerator within the amount presented in the claimed invention. Therefore, the

invention as claimed is patentably distinct from the teaching of the prior art of record, and claims

are in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the

payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for

Allowance."
